

# TREAT HEPATITIS Stop Liver Cancer

1500 people  
die every day from hepatitis  
in the Western Pacific.

They don't need to die.

Existing treatment  
can stop liver injury in  
**over 95%**  
of people with  
chronic hepatitis B.

New, direct acting  
antivirals can cure  
**over 95%**  
of people with  
chronic hepatitis C.

Antiviral treatment for hepatitis can:

- ✓ PREVENT liver failure
- ✓ HEAL liver scarring
- ✓ PREVENT liver cancer

Action is needed:

Enable rapid  
approval of new  
hepatitis medicines

Provide public  
financing for  
hepatitis care  
and treatment

## TREAT HEPATITIS AND SAVE LIVES
